

For men who fly at night

Spectrolab offers a new, free, full-line catalog of airborne high intensity lights.

Law enforcement agencies, search and rescue patrols, fire fighting teams, commercial foresters, coastal guards and border patrol units have all found that safety and efficiency go way, way up with quality illumination.

So if you'd like to increase the flying time of your organization along with overall effectiveness, contact us now for your free illumination systems catalog.

Javelin Night Viewing Devices see through a criminal's best friend—darkness.

More and more law enforcement agencies are turning to Javelin Night Viewing Devices (NVDs) for nighttime surveillance—during the high crime rate hours. Javelin NVDs require no more light source than the stars but provide you with daytime vision.

A wide range of models is available—for naked eye surveillance, to fit on rifles or to attach to cameras—still, movie or TV. In all cases, a Javelin NVD brightens up your field of vision.

Javelin NVDs have been successfully deployed for major drug busts, Highway Patrol studies of nighttime driver abuses, averting burglaries, saving hostages and a host of other surveillance-related activities.

Keep your agency's eyes open at night. With Javelin NVDs. For details contact:

javelin electronics
